25X1X

Incoming fuel shipments at the Soviet fuel depots of Riesa and Muenchenbernsdorf were only partly covered during the period from September to November 1952, while outgoing rail shipments of these depots and the depots of Radebeul and Radensleben during the same period were completely covered. The following is a list of shipments:

Riesa. [REDACTED]1. Incoming Shipments:

Date	Number of Tank Cars	Load	From
16 Sept	29 T	326 tons fuel	Boehlen
7 Oct	29 T	526 " "	"
21 Oct	18 T	318 " "	"
9 Sept	22 T	330 " "	Ruhland
4 Oct	28 T	435 " "	"
11 Oct	24 T	377 " "	"
16 Oct	21 T	300 " "	"
23 Oct	27 T	406 " "	"
27 Oct	25 T	405 " "	"

7	4	59 tons fuel	Berkenbrueck

25X1C

25X1A ☐ Comment. The Riesa fuel depot supplies the units of the Bar Corps of the Twenty-Fourth Air Army. So far, all incoming shipments came from Schwarzheide-Ruhland. The present report confirms the assumption that the depot also receives fuel from other plants in East Germany.

25X1A. [] Comment. It is doubted that the shipments reported as having carried different loads should have actually carried different sorts of fuel. The decrease in the amount of incoming fuel is of interest. Fuel shipped by this depot to units of the bomber corps included a total of 141 railroad tank cars in July, 152 tank cars in August, 117 tank cars in October, and 56 tank cars in November. These figures clearly indicate the decrease in flying activity of these bomber units during the bad-weather season.

25X1A. [] Comment. The rate of outgoing fuel shipments from Muenchenbernsdorf, 25X1C [] as well as Radebeul, [] considerably decreased between 25X1C October and November, which is presumably due to the small consumption of fuel during the bad weather.

25X1A. [] Comment. These are the first outgoing shipments from the Radensleben 25X1C depot, [], which was filled in May 1952. This observation may be interpreted to indicate that as the depot is subordinate to the GOFG, it represents a fuel reserve of the GOFG which serves other depots only if needed.
